CUSTOM  
CABINETRY

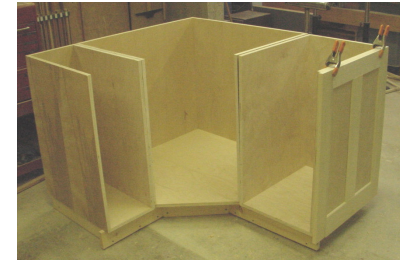

crafted to customer specifications.

**S**tarting with the design process, we work closely with the client to customize every aspect of the project, ensuring that each job is exactly what the customer wants and needs. Once a job profile is developed, elevation, floor plan, and detail drawings are made to illustrate the project. Working from these drawings, the project schedule is developed to chart milestones and project completion. Often this means we interact with the architect and contractor to dovetail with the overall project, ensuring seamless delivery and installation.

**L**ocated in Maine, we are a dedicated custom cabinet shop committed to quality products, built in the New England tradition. Each project is individually

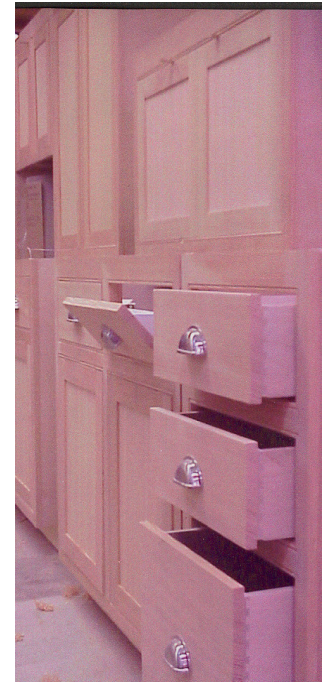

**A**ll of the cabinets feature 3/4" solid birch plywood for the sides, backs and bottoms, instead of pressboard. This

gives our cabinets superior strength and stability. One of the facets of

our drawer construction is the dovetail joinery, for tight, strong construction.

The drawers are made from solid hardwood and have full extension hidden drawer slides. Cabinet doors are joined with rail and stile coping and have either flat or raised panels. We use *Blum* hinges for concealed applications ensuring years of flawless use.

Whether cherry, birch or other hardwoods, we will use the wood that best matches the existing house or design. The cabinets may be either finished to highlight the natural

wood chosen or painted to match the

style. Installation is included with our price.

**T**raditionally our cabinets feature the straightforward *Shaker* or *Arts & Craft* style accentuating form and function,

however as a fully custom shop we are capable of making nearly any design that matches your desire.

**F**or more information, please contact Kurt Clason at 207-247-3639 to discuss your project.
