BIOGRAPHY

With over 18 years experience, first with the Coast Guard renovating and solarizing offshore lighthouses and since 1999 building and renovating island homes on Winnepesaukee, we are your choice for all of your island construction needs.

Additionally, as island dwellers ourselves we understand your expectations and unique needs.

RENOVATIONS, ADDITIONS, DESIGN/BUILD

Working on islands creates a unique opportunity that most companies are not equipped to handle. With over 18 years in dealing with the island environment, K.A. Clason is ready to handle your project. Whether it is a simple addition or renovation to an existing home or new construction we are ready and able to make your dream a reality.

RENOVATIONS/ADDITIONS

The possibilities are limitless – examples include:

- House re-leveling – nature has a way of taking its toll on the early foundations. We are able to re-support the house on new piers and provide new support.
- Concrete work – footings and retaining walls

- Decks and porches

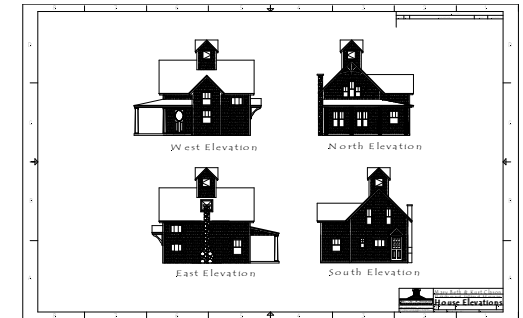

- Custom kitchens – often stock cabinets will not fit, our custom cabinets are surprisingly affordable and fully adaptable to your spaces.

- Docks & walkways – new construction and repairs.

NEW CONSTRUCTION

Working with your ideas, we are able to produce a design and then build from those prints.

From the foundation up, we have the tools and equipment to build your home on any island site. References available
